

Project title :Implementation Client Script & UI Policy

Phase 5: Project Development Phase

1. Project Development Phase

Step 1: Base UI Policy Creation

- Table: Incident (incident)
- Policy Name: High Impact Control
- Condition: Impact IS 1 - High
- Global Execution Settings: Active = true, Reverse if false = true

The screenshot shows the ServiceNow UI Policy configuration interface. The browser address bar indicates the URL: `dev430484.service-now.com/now/nav/ui/classic/params/target/sys_ui_policy.do%3Fsys_id%3D4a18e652f6f4310064771ba6fae314%26sysparm_view%3Dadv...`. The page title is "UI Policy - High Impact Control".

UI Policy Details:

- Table:** Incident (incident)
- Application:** Global
- Active:** ☒
- Short description:** High Impact Control
- Order:** 100

When to Apply:

- Conditions:** Impact is 1 - High
- Logic:** AND
- Global:** ☒ (If selected, the UI Policy applies to all form views, otherwise the UI Policy is view-specific)
- Reverse if false:** ☒ (Reverse the effects of the UI policy actions when the Conditions evaluate to false)
- Apply the UI policy actions when the form is loaded and when the user changes values on the form:** ☒
- Tables that inherit the specified Table inherit this UI Policy:** Inherit ☐

UI Policy Related List Actions:

Field name	Mandatory	Visible	Read only
category	Leave alone	Leave alone	True
assignment_group	True	Leave alone	False

Step 2: UI Policy Action Mapping

- Target Field: Urgency

- Actions: Read-only = true, Visible = Leave as is

Step 3: Deployment of onChange Client Script

- Name: Auto set urgency for high impact

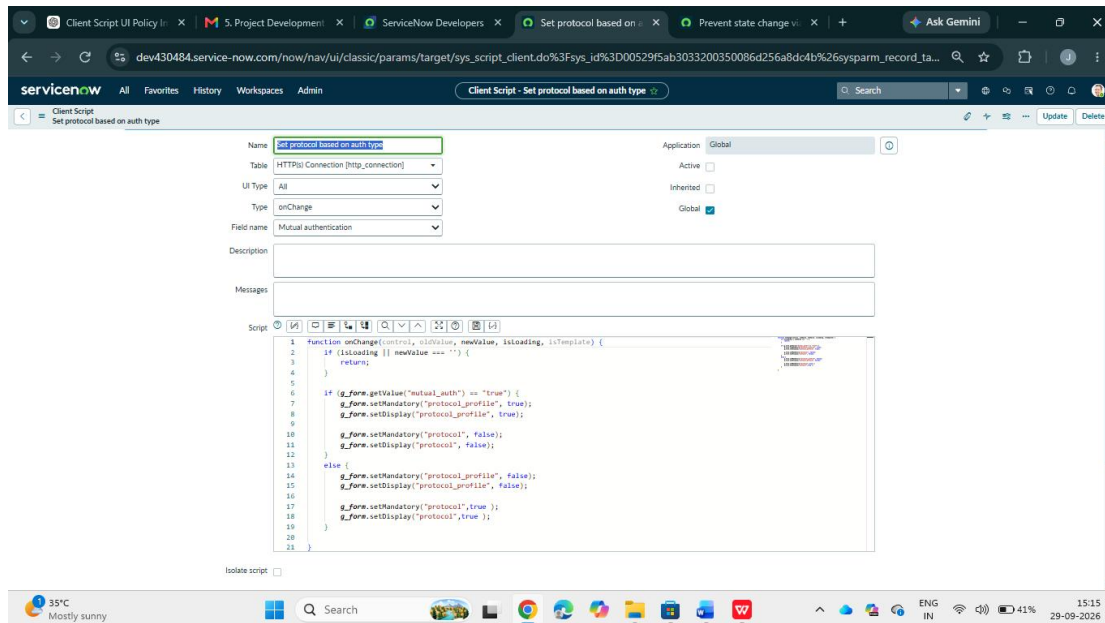

- Type: onChange (Field Name: Impact)

- Source Code:

```
function onChange(control, oldValue, newValue, isLoading)
{
    if (isLoading || newValue == '')
    {
        return;
    }
    if (newValue == '1')
```

```

{
g_form.setValue('urgency', '1');
g_form.addInfoMessage('Urgency set to High for High
impact incident.');
```

Step 4: Deployment of onSubmit Validation Script

- Name: Prevent save if Assigned To missing
- Type: onSubmit
- Source Code:

```

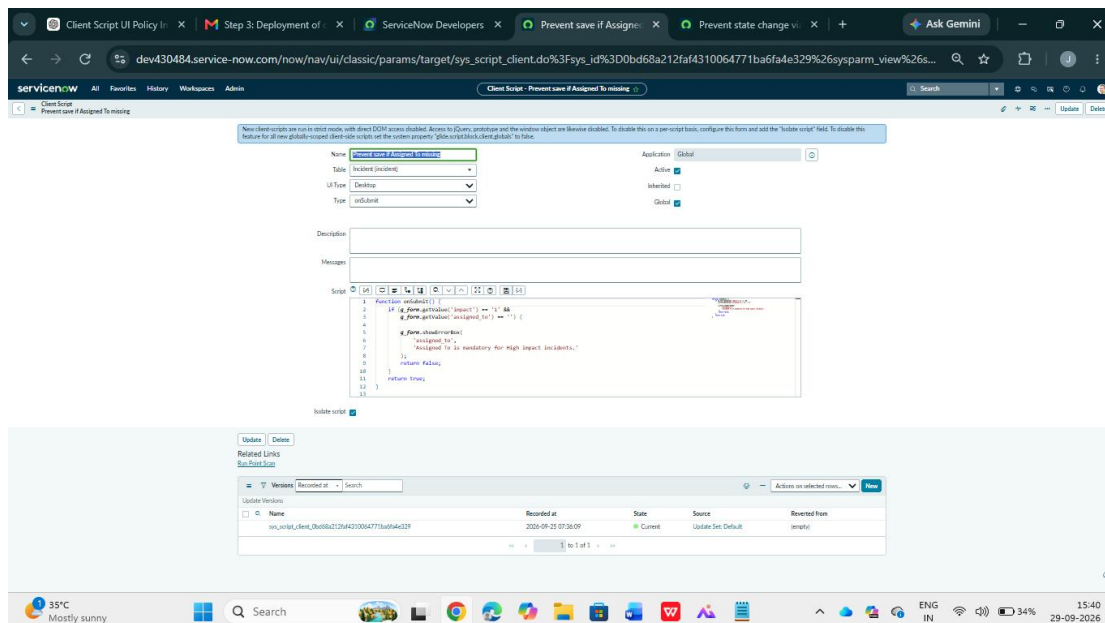

function onSubmit()
{
if (g_form.getValue('impact') == '1' &&
g_form.getValue('assigned_to') == '')
{
```

```

g_form.showErrorMessage('assigned_to', 'Assigned To is
mandatory for High impact incidents.');
```

```

return false;
}
return true;
}
```

Step 5: Deployment of onCellEdit Security Control

- Name: Prevent state change via list edit
- Type: onCellEdit (Field Name: State)
- Source Code:

```

function onCellEdit(sysIDs, table, oldValues,
newValue, callback)
{
    alert('State cannot be updated using list editing.
Please open the Incident.');
```

```
callback(false);
}
```

The screenshot shows the ServiceNow interface for configuring a Client Script. The browser tabs include 'Client Script UI Policy', 'S, Project Development', 'ServiceNow Developers', and two instances of 'Prevent state change via list edit'. The URL is `dev430484.service-now.com/now/nav/ui/classic/params/target/sys_script_client.do%3Fsys_id%3D5019ca652fa4310064771ba6fa4e3bf626sysparm_view%26sysparm...`.

The Client Script configuration form is titled 'Prevent state change via list edit'. It includes the following fields:

- Name:** Prevent state change via list edit
- Table:** Incident (incident)
- UI Type:** Desktop
- Type:** onClientEdit
- Field name:** State
- Application:** Global
- Active:** ☒
- Inherited:** ☐
- Global:** ☒

The **Script** field contains the following JavaScript code:

```
1 function onClientEdit(table, field, oldValue, callback) {
2
3   alert('State cannot be updated using list editing. Please open the Incident.');
```

The **Related Links** section shows a table of versions:

Name	Recorded at	Status	Source	Reverted from
sys_script_client_5019ca652fa4310064771ba6fa4e3bf626	2020-09-28 07:44:44	Current	Update Set Default	amarty

The bottom of the screen shows a Windows taskbar with a weather widget (35°C, Mostly sunny), a search bar, and various application icons. The system clock shows 15:15 on 29-09-2026.
