

# Project title :Implementation Client Script & UI Policy

## Phase 6: Project Testing Phase

### 1. Project Testing Phase

#### Test Case 1: Mandatory and Automated Enforcement Execution

- Action Execution: Open new Incident form, set Impact to "1 - High", and leave Assigned to empty. Click Submit.
  - Observed Results: The Urgency field is instantly set to "High" and locked to read-only. Form submission is halted, and a clear error box is displayed under Assigned to.
- Result: PASSED.

The screenshot shows the ServiceNow Incident form for INC0008111. The form is locked, and a clear error box is displayed under the Assigned to field. The form fields include:

- Number: INC0008111
- Caller: System Administrator
- Watch list: [Empty]
- Short description: ATF - Test1
- Opened: 2019-07-22 14:04:57
- Closed: [Empty]
- Urgency: 3 - Low
- State: In Progress

The form is locked, and a clear error box is displayed under the Assigned to field.

#### Test Case 2: Successful Record Insertion Validation

- Action Execution: Provide a valid value in the Assigned to field on the High-Impact incident form and click Submit.
- Observed Results: The form evaluation criteria pass, client scripts return true, and the record inserts into the database successfully. Result: PASSED.

The screenshot displays the ServiceNow Incident form for INC0008111. The form is titled 'Incident - INC0008111 | Incident'. The main form fields include:

- Number: INC0008111
- Caller: System Administrator
- Watch list: (empty)
- Short description: ATF: Test1
- Opened: 2019-07-22 14:04:57
- Closed: (empty)
- Urgency: 3 - Low
- State: In Progress

Below the main form fields, there is a 'Comments (Customer visible)' section with a 'Post' button. The 'Activities' section shows a history of changes:

- System Administrator: Incident state In Progress was New. Field changes: 2019-09-27 22:59:58
- System Administrator: Impact 3 - Low, Incident state New, Opened by System Administrator, Priority 5 - Planning. Field changes: 2019-07-22 14:05:17

The bottom of the screen shows the Windows taskbar with the date 29-09-2026 and time 15:58.

### Test Case 3: Reverse Condition Dynamic Assessment

- Action Execution: Open a High-Impact incident. Alter Impact from "High" to "Medium".
- Observed Results: The Urgency field automatically shifts back out of the locked read-only state. The Assigned to mandatory condition falls away instantly. Result: PASSED.

The screenshot shows the ServiceNow 'Client Scripts' page. The table lists various scripts with columns for Name, Active status, Table, Application, View, Type, and Updated date. The 'Name' column is highlighted with a search bar.

| Name                                     | Active | Table                                                              | Application         | View | Type     | Updated             |
|------------------------------------------|--------|--------------------------------------------------------------------|---------------------|------|----------|---------------------|
| EF - Show Error Prefix Format Info       | true   | Error Source Application [sys_error_app]                           | Global              |      | onLoad   | 2026-09-25 00:19:21 |

## Test Case 4: Inline List View Restriction Guardrails

- Action Execution: Navigate to the Incident list layout view. Double-click the State column cell of a random record.
- Observed Results: An alert dialog pops up stating that list editing is disabled for State. The grid modification is cancelled. Result: PASSED.
